Subject: AB 683 - 101.862(4)(g) amendment

Hi, Mary,

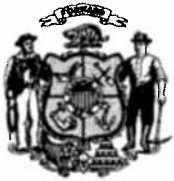

After some back-and-forth among the various stakeholders we've been talking to about this, Representative Larson would like you to draft an amendment so that (4)(g) reads along the lines below:

A person engaged in installing, repairing, or maintaining manufactured equipment or utilization equipment, including ballasts, electric signs, and luminaires, or any other manufactured system that is designed to provide a function that is not primarily electrical in nature if the installation, repair, or maintenance does not involve the modification or installation of conductors. For the purposes of this paragraph [(4)(g)], conductors from the disconnecting point or the last junction, pull, or device box to the manufactured or utilization equipment or the manufactured system are considered part of the equipment or system.

Please let me know if you have any questions or concerns.

Thanks!

Please review this amendment to make sure it achieves your intent. As drafted, the conductors described in s. 101.862 (4) (g) 2 are the only type of conductors that are covered by the exemption. OK?

Also I changed the phrase "last junction" to "nearest junction". OK?
